- Languages: HTML 5, CSS 3, JavaScript

- Applications: React, JQuery, Node JS, MYSQL, Sequelize, MongoDB, Mongoose, IndexedDB, Express, Express-Handlebars.js, Express-Sessions, Canvas, Bootstrap, Git, GitHub

PROJECTS

Wilderness Survival App | https://github.com/Rogers-Development-Services/Wilderness-Survival-App | https://wilderness-survival-app.herokuapp.com/
- This PWA guides it's users to locate consumable plants in nature without internet access.
- Built out React front end and contributed towards PWA using local forage package
- React | HTML | CSS/Bulma Framework | PWA | Sequelize | Node.JS | Express

Cobra Arcade | https://github.com/Rogers-Development-Services/project-2.github.io | https://cobra-arcade.herokuapp.com/
- This web based application records highscores of three arcade games for multiple users.
- Contributed to the back end via sequelize, creating models, and creating HTML and API routes.
- HTML | CSS | JS | Express | Express-Handlebars | Express-Sessions | Sequelize | Canvas | Node.JS

Local Coffee Shop Locator | https://github.com/Rogers-Development-Services/localCoffeeShops.github.io | https://aaronkplatt.github.io/localCoffeeShops.github.io/
- This application will generate the locations of nearby coffee shops, relative to a city search, and the current weather conditions for the city.
- Built out the front end of the application, and contributed to jQuery backend.
- HTML | CSS/Materialize Framework | JS & jQuery | Google API

EXPERIENCE

MAY 2020 - PRESENT
Web Developer Intern | EnterTalk Media Inc. | San Diego, CA

- Efficiently created and continuing to maintain a WordPress website for 4C Business.

SEPTEMBER 2009-2012
Audio Visual Technician | Media Distribution Services | San Luis Obispo, CA

- Effectively managed maintenance and service and operation requests of media equipment including repairing AV equipment

JANUARY 2013-PRESENT
Campus Manager | InterVarsity, USA | Santa Barbara & San Diego, CA

- Cultivated and maintained a fundraising network for 7 years, raising an average of $60,000 annually with a year over year growth by 3.4%. Nurtured a 150+ donor base with regular and effective communication utilizing CRM software to prioritize phases of donor development.

- Effective strategic planning for growth and improvement of client programs and events, increasing attendance and commitment to service by 20% over 5 years using Google Apps, Microsoft Office, Active, WordPress, and Mail Chimp.

- Skilled at creating data tracking programs via google sheets and forms and maximizing regular reporting for following up with diverse populations. Supervised teams of 4-20 leaders annually to connect with over 200+ prospective clients.
