PROJECTS

Wilderness Survival App |
https://github.com/Rogers-Development-Services/Wilderness-Survival-App |
https://wilderness-survival-app.herokuapp.com/

- This PWA guides it's users to locate consumable plants in nature without internet access; researched and constructed API like JSON files for application.
- Designed React front end and contributed towards PWA using local forage package
- React | HTML | CSS/Bulma Framework | PWA | Sequelize | Node.JS | Express

Cobra Arcade | https://github.com/Rogers-Development-Services/project-2.github.io |
https://cobra-arcade.herokuapp.com/

- This web based application records highscores of three arcade games for multiple users.
- Contributed to the back end via sequelize, creating models, and creating HTML and API routes.

- HTML | CSS | JS | Express | Express-Handlebars | Express-Sessions | Sequelize | Canvas | Node.JS

Local Coffee Shop Locator |
https://github.com/Rogers-Development-Services/localCoffeeShops.github.io |
https://aaronkplatt.github.io/localCoffeeShops.github.io/

- This application will generate the locations of nearby coffee shops, relative to a city search, and the current weather conditions for the city.
- Designed out the front end of the application, and contributed to jQuery backend.
- HTML | CSS/Materialize Framework | JS & jQuery | Google API

EXPERIENCE
MAY 2020 - PRESENT
Web Developer Intern | EnterTalk Media Inc. | San Diego, CA

- Efficiently created and continuing to maintain a WordPress website for 4C Business
- Utilized custom HTML & CSS to personalize social media and paypal links.

SEPTEMBER 2009-2012
